

MARGARET HAMILTON

https://www.ted.com/talks/matt_porter_and_margaret_hamilton_nasa_s_first_software_engineer_margaret_hamilton?autoplay=true&muted=true

Answer the following questions:

1. Which team was Margaret Hamilton leading?
2. Did her software succeed?
3. What are Hamilton's qualifications?
4. Who was Charles Draper?
5. What was Apollo Guidance Computer designed for?
6. What was Draper's team divided into?
7. What was the term Margaret Hamilton coined?
8. Which problem did Hamilton's software solve?
9. What/who made Apollo 11 landing a success?

1. Team for developing the pioneer inflight software
2. Yes, it worked exactly as planned
3. majored in mathematics and philosophy
 - research in manassett institute
 - developed software for searching enemy aircraft
4. Renowned engineer looking for help sending ppl to the moon
5. Using input from astronauts guide, navigate, control spacecraft
6. two, one for designing hardware, other for software
7. software engineering
8. To detect unexpected errors and recover from them, created asynchronous program
 - more important jobs would interrupt less important jobs
 - each task had a unique priority, so everything runs in in right order at the right time
9. communicate asynchronously, directly with the pilot
 - detect error quickly, when overload only priority jobs ran, had choice to land/not to land
 - > astronauts, mission control, software, hardware working together as an integrated team
